

DAY 1 - MARCH 17TH

TIME (ET)	SESSION	
11:00 AM	Strategies in Addressing Therapy Resistance in Solid Tumors Neil Bhowmick, PhD	
11:55 AM	Integrating Immune Cells into In Vitro Models for Preclinical Research Ethan Shelkey, PhD	Lonza
12:50 PM	The Rising Tide of GI Cancers in Younger Adults: Why We Urgently Need New Therapies Thejus Jayakrishnan, MD	
1:45 PM	Next-Generation Oncology Drug Discovery: Leveraging RASTRUM™ 3D Models to Accelerate Emerging Cancer Therapies Sean Porazinski, PhD	INVENTIA LIFE SCIENCE
2:20 PM	Who Actually Needs Treatment? Precision Diagnostics, Metastatic Risk, and the Future of Cancer Care Harvey Homan, PhD	

DAY 2 - MARCH 18TH

11:00 AM	The Dark Proteome in Pancreatic Cancer: A Rich Source of Cancer-Restricted Cryptic Antigens William Freed-Pastor, MD, PhD	
11:55 PM	Anti-CSF-1R Therapy with Combined Immuno-Chemotherapy Coordinate an Adaptive Immune Response to Eliminate Macrophage Enriched Triple Negative Breast Cancers Diego Pedroza, PhD	
12:50 PM	Tumor-Targeted Cell Therapies: A New Framework for Immune Activation in Solid Tumors Sanjeev Luther, PhD and Robert Pierce, MD	
1:45 PM	Extrachromosomal DNA (ecDNA): Cancer's Dynamic Circular Genome Paul Mischel, MD
